U.S. Pat. No. 8,337,239

Claim	Evidence
<p>(1.0) An adaptor for allowing use of a micro SIM card in a device using mini SIM cards, comprising:</p>	<p>U.S. Cellular provides the US Cellular 4G LTE SIM Card for Cellphone (3-in-1 Universal Size) (the “Sim Adaptor”) that has an adaptor body with a cutout region that receives micro SIM cards.</p> <div data-bbox="900 402 1530 802" data-label="Image"> </div> <p style="text-align: center;">Figure 1: Sim Adaptor front side</p> <div data-bbox="871 873 1560 1307" data-label="Image"> </div> <p style="text-align: center;">Figure 2: Sim Adaptor back side</p> <p>Source: https://www.amazon.com/Cellular-Card-Cellphone-Micro-Sized/dp/B07HJTNB9R?th=1</p>

Claim Chart for United States Cellular Corporation

U.S. Pat. No. 8,337,239

(1.1) an adaptor body having a cutout region defined by walls in the adaptor, said cutout region shaped to receive a micro SIM card therein; (“Element 1.1”)	<p>The Sim Adaptor satisfies all limitations of Element 1.1.</p> <p>U.S. Cellular’s Sim Adaptor has an adaptor body having a cutout region defined by walls in the adaptor that are shared to receive micro SIM cards. For example, U.S. Cellular sells the Sim Adaptor with a Micro SIM adapter that has an adaptor body with a cutout region that receives micro SIM cards.</p> <p><i>See Figs 1-2.</i></p>
(1.2) a floor on said cutout region for Supporting the micro SIM card therein; (“Element 1.2”) and	<p>The Sim Adaptor satisfies all limitations of Element 1.2.</p> <p>U.S. Cellular’s Sim Adaptor has a floor on the cutout region for supporting the micro SIM card. For example, the Sim Adaptor has a floor in the cutout region that provides space allowing the micro SIM card to be placed.</p> <p><i>See Figs 1-2.</i></p>
(1.3) said adaptor body made of plastic and/or nylon, carbon fiber, aluminum, or similar material capable of with-standing heat levels up to at least about 250 Fahrenheit without degradation. (“Element 1.3”)	<p>The Sim Adaptor satisfies all limitations of Element 1.3.</p> <p>U.S. Cellular’s Sim Adaptor has an adaptor body made of plastic and/or nylon, carbon fiber, aluminum or similar materials capable of withstanding heat levels up to at least 250 degrees Fahrenheit without degradation. For example, U.S. Cellular sells a Sim Adaptor made of, plastic or similar materials capable of withstanding heat levels up to at least 250 degrees Fahrenheit without degradation.</p> <p><i>See Figs 1-2.</i></p>
